PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer and Team Lead with **6+ years** of experience building production software across web, backend and mobile. I design and ship complete products: event-driven **Node.js / TypeScript** backends on **PostgreSQL** and **Redis**, **React** dashboards, portals and edge-rendered websites, and native **Android** apps in Kotlin. I deploy them to **AWS** and **Cloudflare** with Docker and GitHub Actions. I have delivered **50+ Play Store apps** reaching **1M+ active users**, **10+ websites** and **5+ dashboards and portals**, and have led cross-functional teams of 10+ engineers. I also integrate payments (Stripe, Apple, Google Play) and AI (MCP servers, OpenAI, RAG).

WORK EXPERIENCE

Primefit

Oct 2025 – Present

Senior Full Stack Software Engineer | Team Lead

- Own end-to-end engineering of the Primefit fitness and membership platform across backend, web and mobile; lead and mentor the development team and work with product and stakeholders on delivery.
- Architected a **schema-as-code Node.js / Express backend** in which JSON DSL models generate Sequelize models, PostgreSQL tables and role-protected CRUD APIs, with non-destructive schema sync for zero-data-loss releases.
- Built an **event-driven workflow engine on Redis + BullMQ** with a transactional outbox, replayer, dispatcher and scheduler, so business automations run reliably without duplicate or lost events.
- Delivered a **TypeScript membership API** (modular monolith) with Argon2 hashing, TOTP two-factor auth, Zod validation, Helmet, structured Pino logging and Umzug migrations.
- Built **React** frontends: an admin dashboard (Redux Toolkit, Pusher realtime), a CRM (TanStack Query, React Hook Form, Zod, Recharts), a member portal with QR check-in, and a Stripe-powered onboarding flow.
- Shipped the marketing website on **React Router 7 SSR + Cloudflare Workers** with Tailwind CSS, shadcn/ui, GSAP and automated accessibility tests.
- Integrated **Stripe**, Apple subscription reconciliation, Google Play Billing, Firebase push notifications, AWS S3 presigned uploads and transactional email.
- Built a **Model Context Protocol (MCP) server** that gives AI agents safe, customer-scoped access to platform data.
- Set up Docker environments and **GitHub Actions CI/CD to AWS EC2** and Cloudflare; enforced testing (Jest, Vitest, Supertest), code review and API documentation with Postman.

Tecjaunt

Jan 2024 – Jun 2025

Senior Software Engineer | Project Lead

- Led a cross-functional team of 10+ developers and QA engineers, delivering client projects on time by optimising Agile workflows and strengthening collaboration between Android and web teams.
- Designed scalable REST API contracts in Postman and optimised PostgreSQL schemas for faster, more reliable mobile data synchronisation.
- Mentored junior developers in Kotlin, Jetpack Compose and API integration, **reducing onboarding time by 40%**.
- Managed end-to-end delivery of high-traffic applications, including client communication, architecture decisions, server deployments and Google Play releases.

OZI Publishing Sep 2022 – Jan 2024

Android Developer (Kotlin / Jetpack Compose)

- Built high-performance, ad-driven Android apps used by **1M+ active users**; optimised AdMob placement (interstitial, app-open and rewarded ads) across user flows, **increasing ad revenue by 20%**.
- Led the adoption of Jetpack Compose for UI and state management, **cutting UI development time by 35%** and improving maintainability across app modules.
- Implemented subscriptions and in-app purchases with Google Play Billing, **boosting user retention by 25%** and growing recurring revenue.
- Architected apps with MVVM, Clean Architecture and Dagger-Hilt, with modular code and strict code reviews, **reducing production bugs by 50%**.

Tecjaunt Nov 2020 – Aug 2022

Android Developer

- Developed production-ready Android apps with backend developers and UI/UX designers for clients across e-commerce and other industries, contributing to **50+ apps shipped to the Play Store**.
- Built robust network layers with Retrofit and OkHttp, including error handling and caching, for real-time data synchronisation.
- Used Firebase Crashlytics and Analytics to monitor and fix issues, **reducing app crashes by 30%**.
- Managed Google Play Console operations end to end: signing keys, staged rollouts, publishing and policy compliance.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES2023), Kotlin, Java, Python, SQL, C/C++
Frontend	React, React Router 7 (SSR), Vite, Redux Toolkit, TanStack Query, Tailwind CSS, shadcn/ui, Radix UI, React Hook Form, Zod, Framer Motion, GSAP, Recharts, Bootstrap, Sass, HTML5, CSS3
Backend	Node.js, Express, REST API design, Sequelize, BullMQ, event-driven architecture, outbox pattern, WebSockets / Pusher, JWT / JOSE, Argon2 / bcrypt, TOTP 2FA
Databases	PostgreSQL, Redis, Firebase Realtime Database, Firestore, Room, SQLite
Cloud & DevOps	AWS (EC2, S3), Cloudflare Workers, Vercel, Docker, Docker Compose, GitHub Actions CI/CD, Linux
Payments	Stripe, Apple subscriptions, Google Play Billing, in-app purchases, Google AdMob
Mobile	Jetpack Compose, MVVM, Clean Architecture, Dagger-Hilt, Retrofit / OkHttp, Coroutines, Flow, WorkManager, Navigation, Firebase (FCM, Crashlytics, Analytics), Google Maps, Play Console
AI / ML	MCP servers, OpenAI API, LangChain, RAG, Hugging Face Transformers, prompt engineering, Pandas, NumPy
Testing & Tools	Jest, Vitest, Supertest, Testing Library, ESLint, Prettier, Postman / Postman CLI, Git, GitHub, Bitbucket, Agile / Scrum

EDUCATION

BS (Hons) Computer Science, Lahore College for Women University, Lahore 2016 – 2020 · CGPA 3.82 / 4.00
